Website Design Options

32 colour schemes + 10 page layouts = 42 options to mix and match

Every colour scheme is shown applied to the real website.

Pick one colour scheme and one layout - any combination works.

Prepared July 2026

How to use this document

1. Flip through the colour schemes (pages 3-18). Each one shows the actual website rendered in that scheme, plus its five colours with hex codes: PRIMARY (buttons & links), DARK (headings & footer), ACCENT (highlights), LIGHT (section backgrounds) and INK (body text).
2. The website is built so any scheme can be applied in under a minute: open index.html and replace the five hex values at the top of the stylesheet (they're labelled the same way) with the five codes from your chosen scheme.
3. Then browse the layouts (pages 19-23). Each is shown as a wireframe example. Layout A is what's built now; the others re-arrange the same sections, so switching later is straightforward.
4. Shortlist 2-3 combinations you both like, and we'll mock them up.

Example - applying scheme 1 'Fresh Fairway' in index.html:

```
:root{
  --primary: #2e7d32; /* buttons, links, accents */
  --dark:    #1b3022; /* headings, footer      */
  --accent:  #f9a825; /* call-to-action highlights */
  --light:   #f4f7f2; /* section backgrounds      */
  --ink:     #26302b; /* body text                 */
}
```

Layout A — Classic Stack (current build)

Full-width hero with headline left and checklist card right, service cards in a row, photo grid, testimonials, then quote + inquiry forms side by side on a dark band.

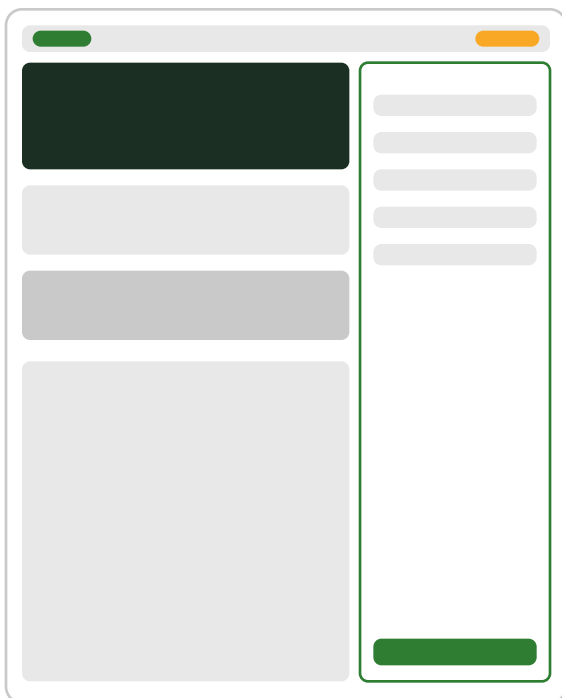

Layout B — Split Photo Hero

Hero split 50/50: text and buttons on the left, a large photo on the right. Feels personal — great once you have a photo of the two of you with your gear.

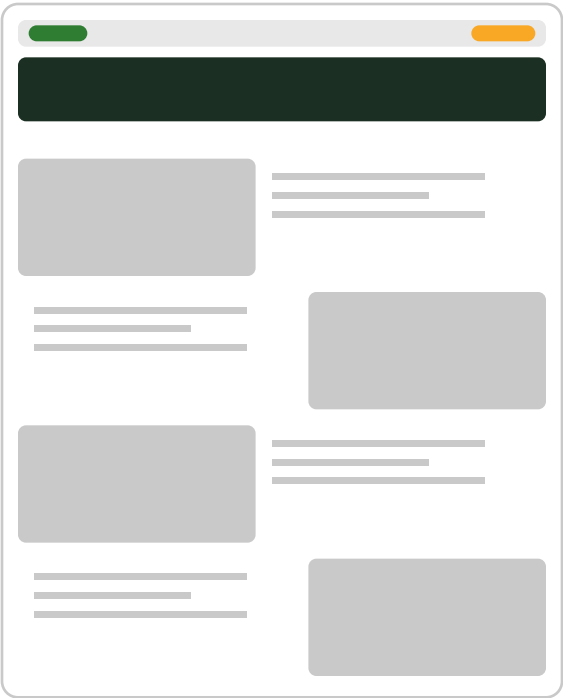

Layout C — Full-Bleed Photo Hero

One big background photo behind the headline with a dark overlay. Dramatic first impression; works best with a strong wide lawn/house shot.

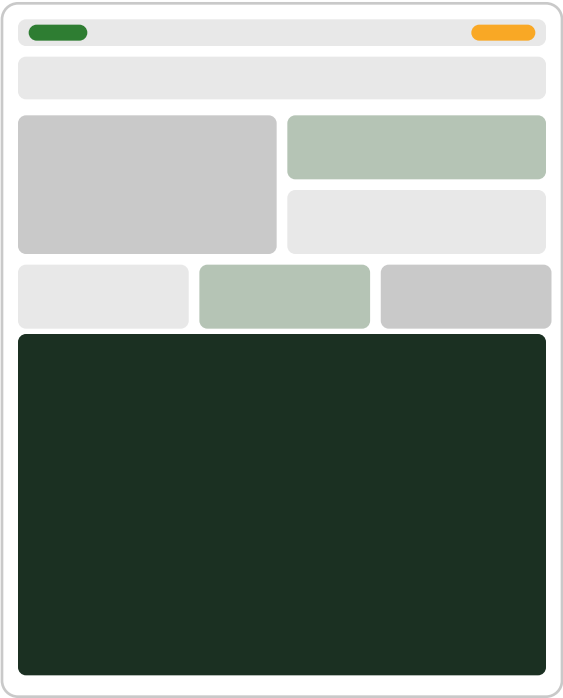

Layout D — Sticky Quote Sidebar

Content scrolls on the left while a compact quote form stays pinned on the right. Maximizes quote requests; form is always one glance away.

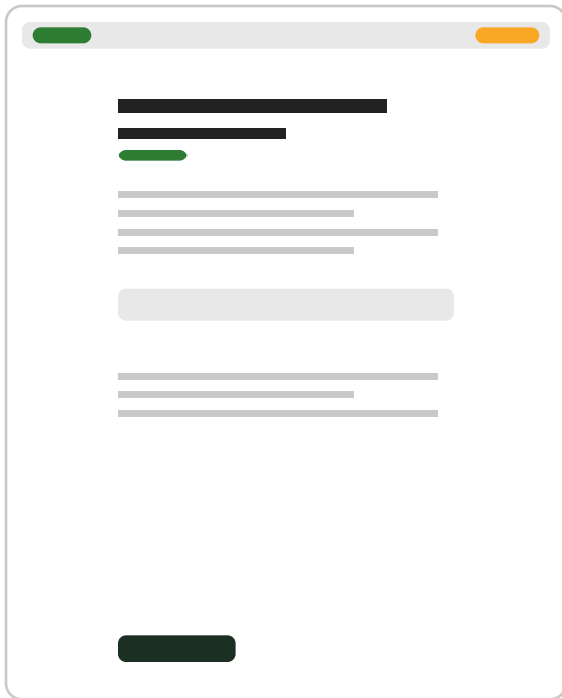

Layout E — Zig-Zag Services

Each service gets its own row, alternating photo-left/text-right then text-left/photo-right. More room to sell each service; page gets longer.

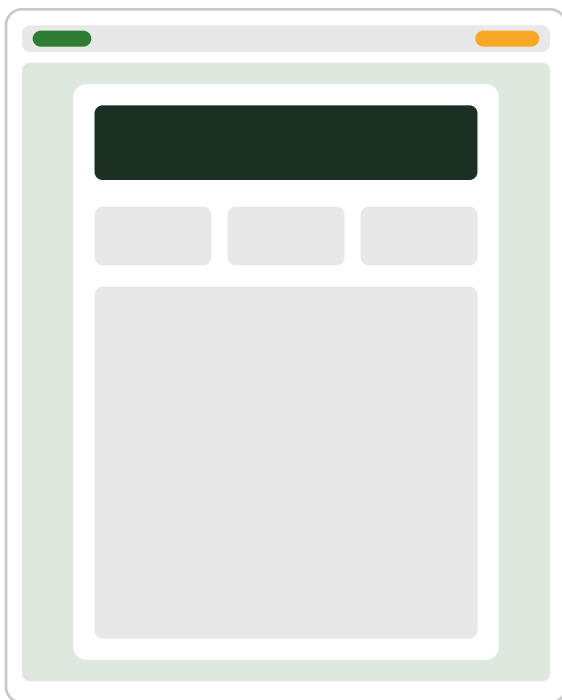

Layout F — Photo Mosaic First

Leads with a big mosaic gallery under a slim header — the work speaks first. Best once you've replaced stock photos with real before/after.

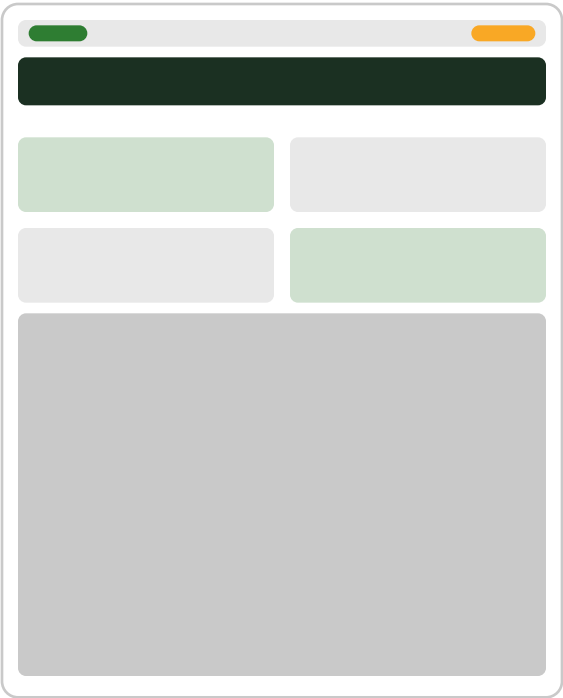

Layout G — One-Page Minimal

Single narrow column, generous whitespace, oversized type, small underline accents. Modern and fast; suits the Graphite Mono or Sage & Stone schemes.

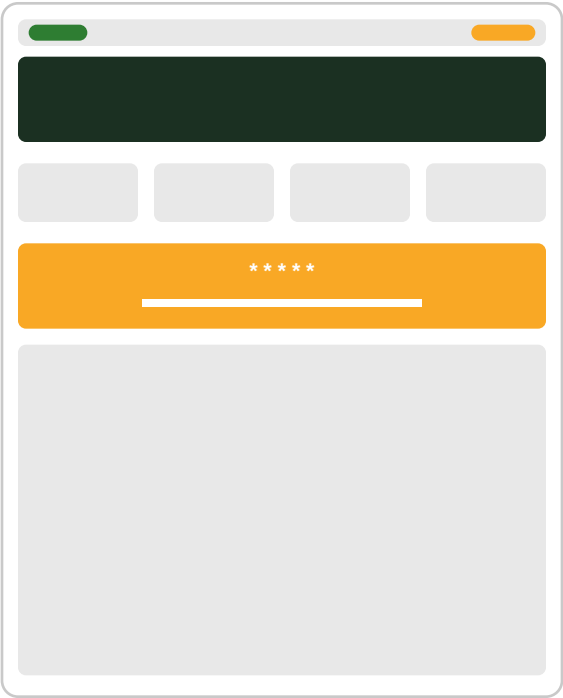

Layout H — Boxed & Framed

All content sits in a centred card 'frame' floating over a tinted background. Tidy, brochure-like feel; pairs well with warm schemes.

Layout I — Services-First Landing

Slim banner up top, then straight into big clickable service tiles that jump to detail sections. Good for visitors who already know what they need.

Layout J — Testimonial Spotlight

A full-width rotating testimonial band sits mid-page between services and gallery, with star ratings front and centre. Leans on social proof to win trust.
